

## **POOL INSPECTION CHECKLIST**

Is the pool fence at least 1.2 meters high all around?   Are the gaps between vertical bars less than 100mm?   Are all fence panels present and securely attached?   Are fence posts firmly secured to the ground?   Is the timber boundary fence structurally sound?   Is the timber boundary fence structurally sound?   Is the timber boundary fence firmly secured to the ground?   Are gaps under the fence less than 100mm?   Is any part of the fence damaged?   Is there a child-resistant barrier (at least 1200mm high) protecting all living areas?  POOL AREA SAFETY INSPECTION   Are there any climbable objects within 1200mm outside the pool fence?   Is the 300mm zone inside the fence clear of any climbable objects?   Are there any objects within 900mm where the fence intersects another fence?   Is a current CPR sign visible from inside the pool area?   Do windows opening to the pool area have a maximum 100mm opening or security screen?   Are there any potential handholds or footholds within 900mm of the fence top/bottom?   For pool fences including patio/deck/pergola/balcony, is one side permanently open?  POOL AREA SAFETY INSPECTION   Are the gate hinges at least 900mm apart?   Do the gates open outward, away from the pool area?   Is the gate locking mechanism at least 1500mm from the ground?   Do the gates self-close and self-lock from any open position?  ADDITIONAL POOL SAFETY MEASURES   Is a current CPR sign prominently displayed in the pool area?   Has the pool been registered on the pool safety register?   Has building approval been secured for the swimming pool/portable pool/spa?	POUL BARRIER / FENCE INSPECTION
Are all fence panels present and securely attached? Are fence posts firmly secured to the ground? Is the timber boundary fence structurally sound? Is the timber boundary fence firmly secured to the ground? Are gaps under the fence less than 100mm? Is any part of the fence damaged? Is there a child-resistant barrier (at least 1200mm high) protecting all living areas?  POOL AREA SAFETY INSPECTION Are there any climbable objects within 1200mm outside the pool fence? Is the 300mm zone inside the fence clear of any climbable objects? Are there any objects within 900mm where the fence intersects another fence? Is a current CPR sign visible from inside the pool area? Do windows opening to the pool area have a maximum 100mm opening or security screen? Are there any potential handholds or footholds within 900mm of the fence top/bottom? For pool fences including patio/deck/pergola/balcony, is one side permanently open?  POOL AREA SAFETY INSPECTION Are the gate hinges at least 900mm apart? Do the gates open outward, away from the pool area? Is the gate locking mechanism at least 1500mm from the ground? Do the gates self-close and self-lock from any open position?  ADDITIONAL POOL SAFETY MEASURES Is a current CPR sign prominently displayed in the pool area? Has the pool been registered on the pool safety register?	Is the pool fence at least 1.2 meters high all around?
Are fence posts firmly secured to the ground?    Is the timber boundary fence structurally sound?   Is the timber boundary fence firmly secured to the ground?   Are gaps under the fence less than 100mm?   Is any part of the fence damaged?   Is there a child-resistant barrier (at least 1200mm high) protecting all living areas?    POOL AREA SAFETY INSPECTION   Are there any climbable objects within 1200mm outside the pool fence?   Is the 300mm zone inside the fence clear of any climbable objects?   Are there any objects within 900mm where the fence intersects another fence?   Is a current CPR sign visible from inside the pool area?   Do windows opening to the pool area have a maximum 100mm opening or security screen?   Are there any potential handholds or footholds within 900mm of the fence top/bottom?   For pool fences including patio/deck/pergola/balcony, is one side permanently open?    POOL AREA SAFETY INSPECTION   Are the gate hinges at least 900mm apart?   Do the gates open outward, away from the pool area?   Is the gate locking mechanism at least 1500mm from the ground?   Do the gates self-close and self-lock from any open position?    ADDITIONAL POOL SAFETY MEASURES   Is a current CPR sign prominently displayed in the pool area?   Has the pool been registered on the pool safety register?	Are the gaps between vertical bars less than 100mm?
Is the timber boundary fence structurally sound?   Is the timber boundary fence firmly secured to the ground?   Are gaps under the fence less than 100mm?   Is any part of the fence damaged?   Is there a child-resistant barrier (at least 1200mm high) protecting all living areas?    POOL AREA SAFETY INSPECTION   Are there any climbable objects within 1200mm outside the pool fence?
